Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having the first and the second anodes are connected to a common terminal external of the casing. Regarding claim 22, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having the casing of the terminal for the cathode. Regarding claim 23, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having the first and second anodes that are isolated from the casing by respective glass-to-metal seals. Regarding claim 24, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having the first and second anodes are spaced apart from each other but isolated from the casing by a single glass-to-metal seal. Regarding claim 25, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having a current collector having opposed first and second major faces provided with cathode active material and positioned opposite the first and second anodes. Regarding claim 26, the allowability in combination with the other claimed features is because nowhere in the prior art is there a capacitor having the first and second anodes made of tantalum and the cathode is made of ruthenium.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
